Why Does a Faculty Administrator Need an Account?

Teacher preparation candidates at your institution will be using the Pearson ePortfolio system to submit work they have completed as part of the edTPA assessment. When they upload documents and videos to the Pearson system, they will have the ability to request feedback from faculty members prior to submitting their assessment for scoring.

If your institution chooses to use the faculty feedback feature, then it is your role as Faculty Administrator to enter and maintain the list of faculty members who are available for candidates to select to review their work.

If your institution chooses not to use the faculty feedback feature, then you do not have to maintain a faculty reviewer list.

You may also use this tool to assign another Faculty Administrator as a backup for your role.
