Overview and Exam Framework

Sample Selected-Response Questions

Sample Selected-Response Answers and Rationales

Answer

Option A is correct because the word map allows students to discern similarities and differences among words and create links to known words in their primary language. **Option B is incorrect** because word maps are not part of scanning unfamiliar texts. **Option C is incorrect** because students are not participating in any translation activities. **Option D is incorrect** because students are not applying memory-based mnemonic devices in the word-map activity.
